Eleonora Vargas

The well-known geologist, Professor Hutton, has found a diamond of unusual proportions, so that the thirty fragments derived from the processing of the main stone, used for a ring, constitute by themselves a collection of inestimable value. The dark disappearance of the Professor unleashes a battle between the international underworld to recover the ring, take possession of the fragments of the diamonds and find the microfilm on which the geologist has set the elements for the identification of the exceptional field from which the stone comes.
